

ZERO WASTE

REDUCE. REPAIR. RECYCLE.

→ **PRIMARYLY SUSTAINABLE // POLES**

KOMPERDELL

Sustainability is not just a slogan, it's a core belief of our company.

Thomas Roiser, CEO KOMPERDELL

PRIMARILY SUSTAINABLE

PIONEER IN SUSTAINABILITY

We live, work and think according to our very own values. And we have been doing so for over 40 years – long before the term „sustainability“ became an integral part of our vocabulary.

Because our world is really important to us, because we bear responsibility – not only for ourselves, but also for future generations and not least because we love the natural environment in which we live, it is important to us to avoid waste and use our resources sparingly. For us, sustainable action is therefore not an fundamental principle, but a self-evident need!

ECO BUT LOGICAL

We are known for our commitment to high functionality, robustness and stability of our products.

It is therefore essential for us that the ecological aspect never comes at the expense of product quality, but that both must function exclusively in direct interaction – logically!

GREEN BUT HONEST

We do not invest in the purchase of certificates that promote greenwashing.

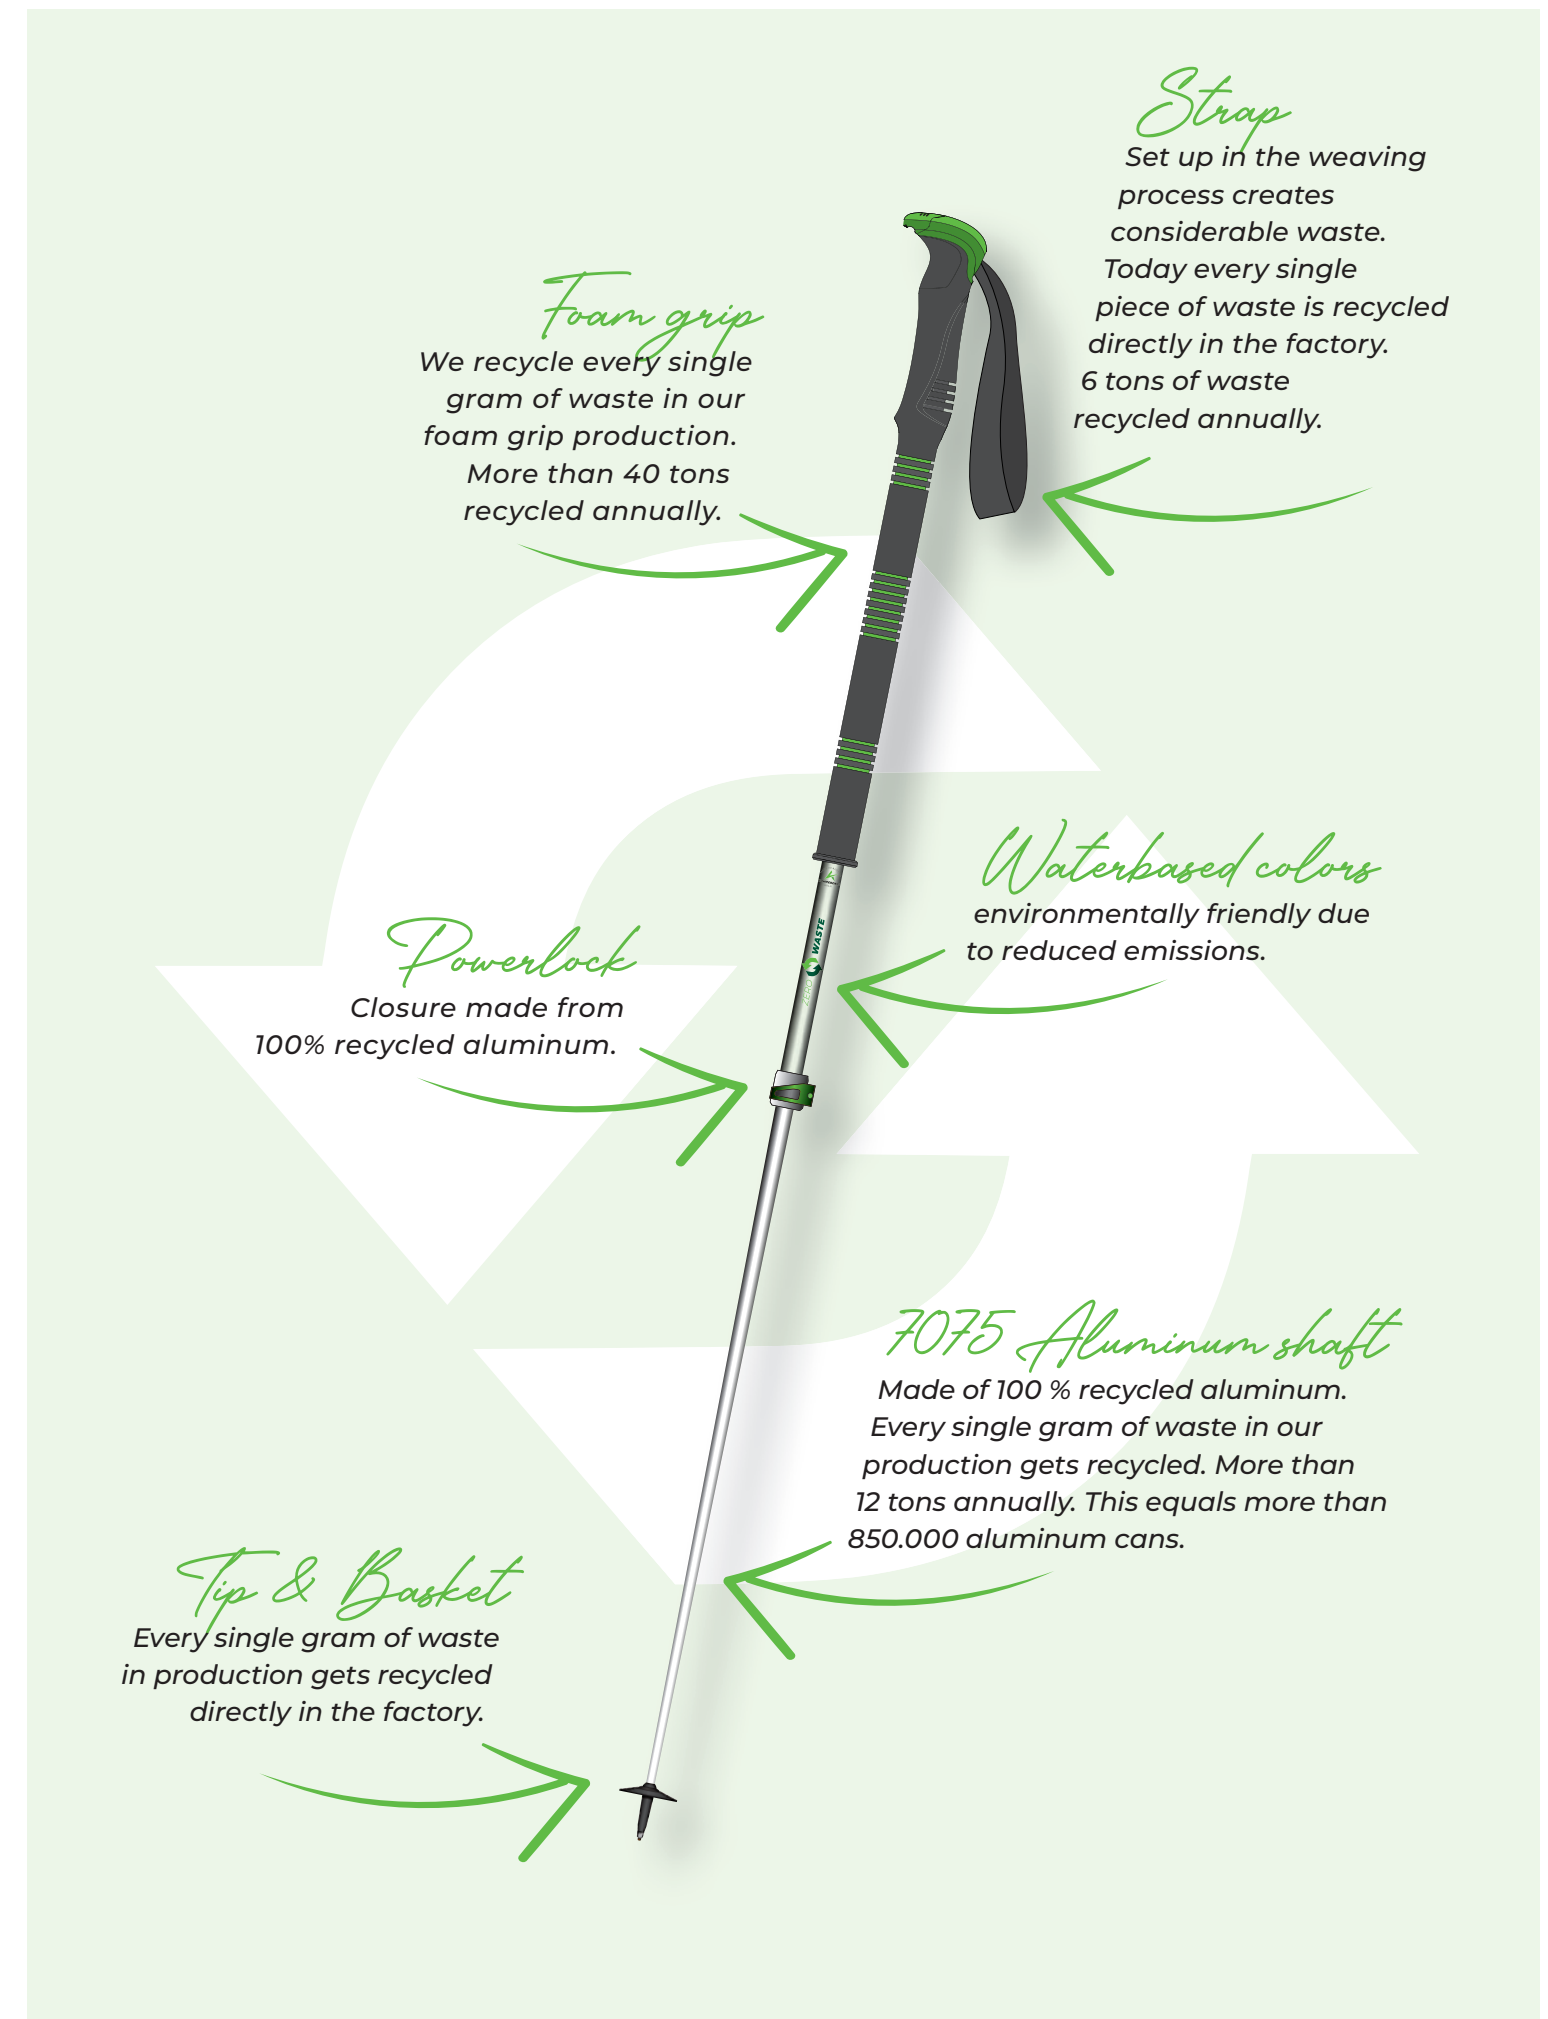

We have therefore developed our new Zero Waste Program to reflect our complete ecological self-image as transparently as possible.

**REDUCE
+ REPAIR
RECYCLE
= ZERO WASTE**

WHAT DOES ZERO WASTE STAND FOR?

- **We design and produce where we live – in the heart of Austria.**
 - + Due to our long lasting relation with local suppliers and a stock of the most important raw materials, we are not only able to satisfy our customers needs quickly, but also save a lot of CO₂ emissions.
- **The cleanest pole factory in the world.**
 - + In our modern, electrostatic paint shop, we only use waterbased colors.
 - + Our production machines are equipped with highly efficient extraction systems. Every last aluminum dust particle is filtered out, bound and 100% recycled.
 - + The entire emissions of our modern factory are less than those of a regular household kitchen.
- **We shy away from any loss of energy.**
 - + We obtain 100% of our energy from renewable resources. In addition, all our buildings are optimally insulated and state of the art insulation and heating.
- **From old to new.**
 - + All our materials are either already recycled or we return them to the recycling process.
- **Long-lasting and durable.**
 - + What we do, we do right! It is important to us that our products are inherently extremely robust and stable and, if possible, accompany you for a lifetime.
- **Repairing instead of throwing away.**
 - + We have been pioneers for over 15 years with our unique 3-year free repair service. We repair every Komperdell product within 24 hours without any questions asked!

HOW DOES ZERO WASTE WORK?

REDUCE

Green, but honest – zero waste in production

We do not believe in labels and certificates.

Our approach to a more sustainable production is simple and honest. Our goal was to produce our poles without a single gram of waste and with the smallest possible environmental impact.

REPAIR

Repairing instead of buying new

We launched our 3-year free repair service more than 15 years ago. No questions asked – no matter if it is our customers' fault or ours. Our service is part of our belief that quality products must be backed by outstanding service.

RECYCLE

Eco, but logical

If your pole can no longer be repaired, please send it back to us. We have created a dedicated recycling department as we are best suited to separate and recycle the materials in a pole.
